

PRODUCT DATA SHEET

Freezer Grade Label

Labels for Freezer and Mid Temperature Products

Custom Security Industries

PRODUCT DESCRIPTION

The Freezer Grade Label is used to affix the Acousto-Magnetic (AM) sensor securely to products that are refrigerated. These low temperature environments present unique problems in that the adhesion of the AM sensor may be diminished. With the Freezer Grade Label, the contact surface is larger and the bond between the label and the food package is enhanced because of the low temperature operation of the adhesive. These labels are also custom printed to provide information and additional security by hiding or camouflaging the presence of the AM sensor.

PRODUCT SPECIFICATIONS

Dimensions

2 3/4 in x 1 3/8 in Oval (70 mm x 35mm)

Material

Biaxial polypropylene film

Adhesive

Operating temperature -
-50 degrees C to + 80 degrees C

Printing

Clear or custom printed

Packaging

500 Labels per roll

Order No

FGL-DR
FGL-MW

Features

- Affixes AM sensor firmly to refrigerated merchandise
- Hides or camouflages AM sensor on package
- Low temperature adhesive
- Can be printed with text, logos and graphics in multiple colours

EAS Sensors

Sensormatic® DR or MW

Suggested Applications

- Frozen shrimp
- Cold deli bags
- Meats, cheese
