

Dual Tag™

The Dual Tag™ incorporates an AM EAS tag with an RF or RFID tag applied to a polyester, or anti-static liner. The label is manufactured with or without cover stock. Dual Tag™ offers the widest flexibility in the placement of multiple pressure sensitive labels for high-speed source tagging applications. Sensors can be placed and spaced on polyester or anti-static release liner according to the specific application. Applying two sensors in a single production run, saves time and money.

PRODUCT SPECIFICATIONS

Dimensions

Label Repeat Variable
Standard Width 2.5" (63.5mm)

Printing

N/A

Packaging

Rolls of 4,500 - 5,000 13,500 - 15,000/Case
Core Diameter 6" with 3" insert

Features

- Dual Sensor
- Optimal High-Speed Application
- Labelling at Source
- Manufactured in North America

EAS Sensors

- Sensormatic® (AM)
- Sensormatic®, Checkpoint or alternative RF available on request
- RFID available on request

Suggested Applications

- Source Packagers and Manufacturers

CSI is a Sensormatic Solutions Value Added Reseller **Sensormatic**
